EB-200QHC Light flame treatment machine

Product Details

1. Conical fixture can be replaced according to size of fixing part of substrate to meet the requirement for different size of substrate;
2. In electrical control, imported advanced mini-motor is used with stepless change to meet the requirement of various substrate;
3. Unique designs of flame nozzle and distributor make fuel utilization rate high, so it is an every-saving product;
4. Integral structure is novel, design suitable and operation easy. Roller wheels are installed at the foot to provide convenient movement.

Flame width	200 mm
Fuel gas	standard liquefied gas
Power supply	220V/50Hz
Dimensions	1000Å—480Å—1200 mm
