

Printing peripheral series

EB-300YHC Multi Station Cylindrical Flame Treatment Machine

Product Details

The product is mainly used for the surface flame treatment of various cylindrical PE and PP plastic products. The molecular structure for the surface of substrate treated by the machine is changed so that the print ink adherence is improved.

Flame width	250 mm
Fuel gas	standard liquefied gas
Power supply	220 V/50Hz
Dimensions	1850Å—530Å—1200 mm
