## 6-Color Pad Printer with Independent Pad and Servo Shuttle

### Features

- PLC controlled functions, user friendly interface, simple and convenient operation;
- 6-color ink cup pad printer adopts servo motor and high-precision screw drive, coordinating with independent pad to realize left/right printing in any position;
- High-quality aluminum alloy is used to make structure solid and weight light; the base adopts steel plate structure which is firm and stable;
- Adopt ink applying by ink cup, ink density is stable; it is unnecessary to add solvent within 6-8 hours, the ink is less volatile, difficult to splash, saving more than 50% ink, operating environment is clean and comfortable;
- Ink cup is durable and the removal and installation is convenient;
- Unique cup-shaped structure ensures neat ink scraping; the printing product is clear and beautiful;
- Left/right moving position of worktable can be adjusted according to different printing requirement;
- Six up/down independent run pads best suit the printing of elongated work-piece with many image;

### Technical Data

● Steel plate size	100x250 (mm)
● Max. Printing speed	400 (pcs/hr)
● Air consumption	400 (L/min)
● Rated power	250W
● Rated voltage	1 $\Phi$ AC 220V $\pm$ 10% 50Hz
● Rated current	10A
● Noise	<80 (dB)
● Outline dimension	1335x1210x1825 (mm)
● Weight	550 (kg)
